Most refills will fit into more than one size binder album. This allows you to select varying size pocket refill sleeves and store a variety of different types of items all in ONE SINGLE binder album. The prefix of each refill denotes its overall refill size, (not pocket size), see below or while on the website click on the individual refill description to view which binder albums are compatible with that refill.

Dear Collector

A very warm welcome to Arrowfile and our latest catalogue.

The keyword is not 'Value' but 'Interest'. The interest your collection holds for you is priceless and like the best things in life have and will always come free. What you look after and care for the most does not have to necessarily have an integral value. The most irreplaceable items are your memories, which are often captured in photographic form or through mementoes and memorabilia that you have collected.

Even with established 'Collectables' and other collections such as your CD/DVD or record library, the enjoyment comes not from the value, but from the pleasure the items give you.

It is also as much in the sharing and collating of the information as in the simple addition to it. This certainly applies to us! Whenever our family gets together and we reminisce and discuss old times, out come the family photos and stories that are related to the time the photo was taken.

At Arrowfile we are proud to offer a wider range than ever of practical and flexible archival solutions to safeguard some of your most treasured memories, possessions, and collectables for your enjoyment and that of future generations.

With the minimum of planning and effort you can ensure that your photos, records, CD/DVDs, documents and collectables can not only be protected for years to come, but also found quickly and efficiently.

Thank you for your continued support.

#### How to use

The handy magnetic clip closure allows the frame to open out flat and close like a book. The object is placed on one of the two silicone membranes and the frame closed, so it is surrounded by the two silicone membranes and remains in place. The two halves are held firmly together by the magnetic lock. The floating frame closes perfectly and protects your treasures from dust. The object can be removed at any time to exchange it for another item. The suggested size of each object should be approximately 10mm less than the depth as stated in the outside dimensions.
